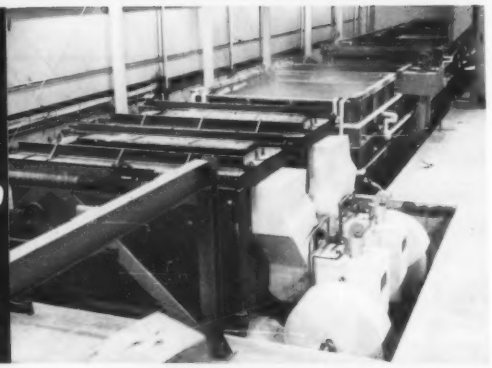
carl mayer

HI-SPEED REGISTERED ROD-BAKERS



Faster baking, greater fuel economy, maximum production efficiency are just a few of the results of the exclusive heating arrangement of the Carl Mayer Hi-Speed Rod Baker. It also has a patented blow-off feature which removes moisture without-damage to coils.

Here are just a few of our many satisfied customers:

Armco Steel Corp.
Bethlehem Steel Corp.
Colorado Fuel & Iron Corp.
Crucible Steel Co. of America
Driver-Harris Co.
Indiana Steel & Wire Co.
International Nickel Co.
Jones & Laughlin Steel Corp.
National Screw & Mfg. Co.

LET'S TALK QUALITY, MINIATURIZED, ENGINEERED TORQUE CONTROL... LET'S TALK PERMA-TORK®

When you're looking for an engineered, precise answer to a miniaturized high-tech torque control problem ... let's talk PERMA-TORK.

For tensioning, torque limiting or magnetic coupling capability ... for productivity and proven capability over a wide range of applications, let's talk PERMA-TORK.

For zero maintenance, zero power consumption, soft starts and PERMA-TORK ... ask for our catalog.

Sales Manager

We can solve your wire identification problems and cut your costs

WITH OUR EQUIPMENT

Consoles, in-line modular systems and wire handling equipment ... efficient, time saving systems that identify either white or obsolete coded wire on demand to your specs.

WITH OUR INK

Standard or speciality inks for each application to each insulation from PVC to Teflon ... including the all new NFR Series NON-FLAMMABLE INKS and FIBRE OPTIC INKS.

Formulabs R&D lab technicians and sales engineers, backed by thirty years experience worldwide, can solve your wire identification problems.

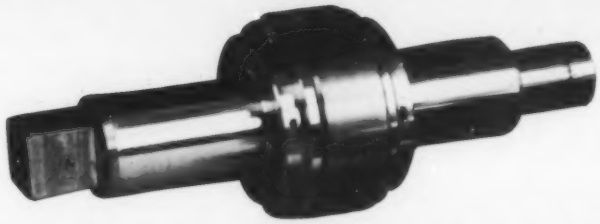
Tungsten Carbide Wire Shaping Rolls



New Rolls or Re-sleeving of Worn Rolls

Manufacturers of:
- Wire Flattening Rolls
- Wire Forming Rolls
- Wire Straightening Rolls
- Turks Head Rolls
- Guide Rollers
- Strip Mill Rolls

Our service continues after the sale. We offer:
- Re-sleeving
- Re-grinding

for steel rolls, composite rolls, and tungsten carbide rolls.

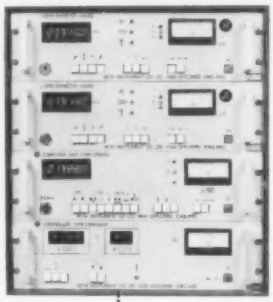
WALL THICKNESS MEASUREMENT AND CONTROL
Not just another Diameter Measuring and Control System

ROTAMASTER®



Beta's Better.

- ☆ Choice of Laser Diameter Gauging Systems to Cover Diameters up to 12". Dual Plane, XY, Measurement also available.
- ☆ Automatically compensates for shrinkage.
- ☆ Compensates for products transfer time between gauges.
- ☆ Compensates for cyclic product variations inherent in bunched, twisted, compacted, or armored cable forms.
- ☆ Thickness control to 0.0004".

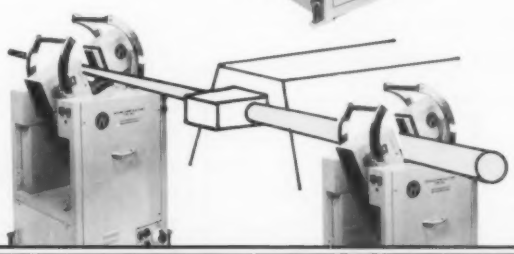
If you want all of the above, *plus* a unit that can monitor and control irregular shaped profiles... BETA'S ROTAMASTER IS WHAT YOU NEED.

- ☆ Maximum representation as product is monitored over a full 360° of its periphery.
- ☆ Fully addressable Micro-Processor, Type LI 800-R
- ☆ Displays and outputs Maximum, Minimum, Average, and Ovality data on measured profile
- ☆ *Any* external profile can be monitored: rounds, ovals, sectors, flats, pre-spiralled.

PUT TWO ROTAMASTERS IN CASCADE... and you'll have Beta's Unbeatable Wall Thickness Control System
Make your production line better by design

Indicator Type LI 800-R

Rotamaster stand, type RS-1, for use with any choice of laser gauge head



For complete details, contact Allan Ghazarian, Beta Instruments Inc., 106 Longwater Drive, Assinippi Park, Norwell, Mass 02061 USA (617) 871-2712

DREVER

PROTECTIVE ATMOSPHERE WIRE FURNACE *Without Alloy Muffles*

■ GENERATES reducing atmosphere in exit zones and burns it in the entrance zone to save fuel.

■ PREVENTS oxidation of the wire while in the furnace.

■ PROVIDES higher process speeds because it can be operated at high heat heads.

■ SAVES fuel because there is no muffle tube temperature gradient and no atmosphere loss.

The Drever design eliminates: radiant tubes; alloy muffles that plug and need replacement and the generation of costly protective atmosphere gas. In addition, burners and equipment are "off the shelf" American made and the furnace is shop assembled for lower installation costs. The fiber roof provides easy access.

Get more details on how this exceptional fuel and atmosphere saving Drever furnace can meet your wire heat treating needs. Write or call today.
